NETWORKING CENTRE

The London Patent Summit is a leading two day international conference dedicated to bringing together patent and IP owners, investors and service providers for further advancement in technology and manufacturing. The event addresses key challenges and issues facing patent and IP professionals and investors today and provides meaningful and valuable insights into the technology research and development market.

The London Patent Summit is also an annual meeting platform for patent regulators, policy makers, board-level patent managers, as well as patent experts and investors in a dialogue designed to address and to discuss best practices and solutions to enhance global, regional and national patent management strategies and IP commercialization to support industry which is valued at £65 billion per annum in the UK alone.
